Response to Arguments

In view of the Appeal Brief filed on August 04, 2004, PROSECUTION IS HEREBY REOPENED to thereby simply the issues before the Board. Hence, a Non-Final Rejection is set forth below.

To avoid abandonment of the Application, Appellant must exercise one of the following two options:

(1) File a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) request reinstatement of the Appeal.

If reinstatement of the Appeal is requested, such request must be accompanied by a **Supplemental Appeal Brief**, but no new amendments, affidavits (37 CFR 1.130, 1.131 or 1.132) or other evidence are permitted. See 37 CFR 1.193(b)(2).

Finally, all present arguments are moot in view of the current Action.

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 32-56 and 59-91, drawn to a method of and system for delivering incentives over the Internet comprising a Web site for providing purchasing

Art Unit: 3622

incentives from multiple sources, a consumer purchase history database based on consumer online shopping activity, a consumer database, which can identify consumers by their e-mail addresses, wherein said consumer database is connected to said Web site so as to receive consumer data from said Web site and means for delivering purchasing incentives to consumers by e-mail.

II. Claim 57, drawn to a method of and system for providing, via a Web site, purchasing incentives from multiple sources such as retailers and manufacturers comprising a personal database, a consumer purchase history database based on consumer online shopping activity, **means for generating a web page with a consumer-specific display and means for updating said web page.**

III. Claim 58, drawn to a method for delivery of incentives by e-mail, comprising the steps of maintaining a consumer database, which identifies consumers by their e-mail addresses, generating targeted purchase incentives from a consumer purchase history database and **formatting an e-mail message to a consumer by electronic mail for subsequent printing of a coupon and delivering said e-mail to the consumer.**

The inventions are distinct, each from the other because of the following reasons:

Art Unit: 3622

For example, Inventions I and II are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed. The subcombination has separate utility by itself such as **means for generating a web page with a consumer-specific display and means for updating said web page.**

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art and required a separate search and hence, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Moreover, claims 32-56 and 59-91 of this Application are directed to patentably distinct species.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Art Unit: 3622

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should Applicant traverse on the ground that the species are not patentably distinct, Applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the Examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
